

Ariel & Shya Kane are internationally acclaimed seminar leaders and consultants

who have been offering courses and executive coaching since 1987. The Kanes have pioneered a revolutionary new technology, Instantaneous Transformation®, which has helped thousands of individuals and companies dramatically increase productivity, effectiveness and job satisfaction. What makes their approach unique is that it is not problem/solution oriented. The Kanes have found that the simple recognition of unexamined behavior patterns or beliefs is enough to facilitate resolution without having to work on them as problems. They are masterful at identifying and communicating the dynamics that unknowingly undermine an individual's or organization's effectiveness and productivity. The Kanes have found that the slightest shift in one's reality can produce a quantum shift in the ability to optimize time and successfully manage projects to completion - - Instantaneous Transformation.

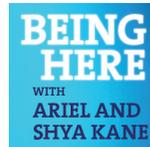

Acting as Catalysts for Effective Communication™

The Kanes provide consulting and seminars for a range of clients from individuals and entrepreneurs to large corporations in the US, Europe and Central America. Their articles have been published internationally since 1992. The Kanes' award-winning books are bestsellers, including their first title, *Working on Yourself Doesn't Work*, which has been translated into German, Japanese, Russian, Dutch and Thai.

The Kanes' approach allows you to let go of your limitations and step into infinite possibilities. In the past, new projects were often stressful and agonizing and my habit of second-guessing myself made tasks take twice as long. With the tools I have learned in this course, these old habits have fallen away and time and project management has become easy, effective and fun.
